GABATON-62

Agent has been recruited and offered to BOZ for assignment to CASPUR-3.

*Has POA only good until 1 Dec 61*  
GABATON-61

Agent was recruited and offered to Headquarters on 29 May 1961 for assignment to a sensitive operation. No reply has been received as of this writing.

3. AGENCY PERSONNEL: We have two agent prospects on whom we are awaiting POA to contact. They are the Subjects of FROB 9281 and FROB 9456. GABATON-37 has also furnished a lead on whom we plan to start POA processing shortly. In of this writing, it does not appear likely that the Subject of FROB 8795 will accept recruitment. However, the case officer plans to contact this lead again and attempt to refurbish his once indicated willingness to accept recruitment. *What about FROB-9387*

(ALTENRATH) - should we stop processing?

4. SECURITY: There have been no security incidents involving GABATON assets during the period under review.

5. FINANCES: During the period under review our payroll increased by 100.00, representing \$450 per month to the new GABATONS 62 and 63. Recorded expenses for the period totalled [ ]

6. DEVELOPMENT AND PLANNING: As of this writing, all of our LLDs are either assigned or have been offered to other bases for assignment, with the exception of several who have been compromised to Eastern intelligence services through past assignment to denied area operations. We plan to retain a small number of these compromised LLDs for the present time so that we may assign them to non-denied area operations in which security considerations do not preclude their use. Based on the requirements for LLDs that have been levied upon us during the past few months, and assuming that the requirements for LLD support will continue approximately at the same level during the coming months, we feel that a reserve of 3 to 4 tested, unassigned LLDs should be maintained at all times. If such a reserve is maintained, we believe that we will be able to perform our GABATON functions adequately. We will, of course, call upon our already assigned LLDs to take on additional assignments as the requirements permit. We plan to work toward this goal during the coming three month period.
